## KEY PROJECTS

### Basketball Scorecard

#### Details

Using HTML/CSS/Javascript

Used Figma design tool for layout

A webApp that allows us to count the scores of the Home and Guest teams

### Built a Chrome Extension

#### Details

Using HTML/CSS,Javascript

Using JSON and local storage for data storage purpose

Allows us to manually store URLs or grab one from the current tab and store that in our local storage for future retrieval . Also allows us to delete an existing URL from the extension.

### Built the Amazon-clone

#### Details

Using React , Firebase,React-Redux(for managing state of the application).

Functionalities: Allows users to sign in with their mail id and password and signout . Allows users to checkout items by clicking on the Add to cart button and the subtotal price of the cart items is displayed .

### Built a meme generator

#### Details

Using HTML/CSS,Javascript,ReactJs

Meme Generator - Using Database APIs and useEffect

Allows us to randomly pick a meme from the data fetched from an API,also allows us to add text over the meme
